

2022 MATH SEMINAR

KENIA PINA

FEBRUARY 28, 2022

4:30PM

Zoom ID:

868 4926 9662

Our guest speaker is Kenia Pina! Her talk will be on *Biomarker Discovery by Semi-Supervised Non-Negative Matrix Factorization*.

Come explore her talk on “biomarker discovery that identifies relationships between potential cancer variables and specific cancer types”. This project proposes “to use more advanced semi-supervised non-negative matrix factorization algorithms that take into account the type of variables that are being analyzed and thus use more optimized norms”.

Everyone is welcome!
